I, \_\_\_\_\_  
certify that seed and mulch will be maintained on site until permanent vegetative stabilization (at least 85% vegetative coverage of bare soil) is established on the above-referenced property.

I also grant access to King William County staff to inspect the progress of this project every two (2) weeks from the date of this Agreement, until staff determines that adequate vegetative coverage has been achieved. I agree to seed and mulch all areas that do not establish adequate vegetative coverage within four (4) weeks of initial seeding, until permanent vegetative stabilization is achieved.
